

# SAVE THE DATE

## 2019 EUROPEAN API RBI USER GROUP WEEK GENOA, ITALY

The 2019 European API RBI User Group week will be held September 23 – 27 in **Genoa, Italy**. IIS GROUP srl (IIS) has generously offered to host the event at their offices for a second time. Equity Engineering Group, Inc (E<sup>2</sup>G) and IIS have begun preparations for the upcoming meeting week and look forward to presenting industry topics and sharing user experiences. The full week program has been separated into three sessions to allow registration and attendance for sessions of interest at user's preference. Registration is required to reserve attendance. No fee will be charged for attending any of the three technical sessions.

### » SCHEDULE OVERVIEW

DATES	DAYS	DESCRIPTION	ATTENDEES
SEP 23	1	Risk-Based Inspection Fundamentals	New or Prospective RBI Users
SEP 24* – 25	2	API RBI User Group Meeting	API RBI Software Users - All Levels
SEP 26 – 27	1.5	Advanced Topics	Advanced Users

\*Group Event planned for the evening of September 24

#### » SEPTEMBER 23, 2019

Risk-Based Inspection Fundamentals will cover basic topics for issues related to launching or enhancing a Risk-Based Inspection (RBI) program. The topics covered during this session are ideal for those new to RBI or for those considering the application of a risk-based approach for inspection optimization.

#### » SEPTEMBER 26-27, 2019

The advanced topics session will cover HTHA, current NDE technology, Fitness-for-Service, other challenging industry topics along with a tour of IIS laboratories. This session may be attended independently of the API RBI User Group meeting.

#### » SEPTEMBER 24-25, 2019

The API RBI Software User Group meeting is an interactive two-day meeting to present and share knowledge regarding risk-based inspection methodology advances, implementation and experiences. The API RBI software by E<sup>2</sup>G is the official software implementation of API Recommended Practice 581, Risk-Based Inspection Methodology. E<sup>2</sup>G will present topics pertaining to the software and the quantitative methodology defined in the document as well as new technology developed by E<sup>2</sup>G to expand the scope of RBI. An overview and demonstration will be given summarizing software updates since the last European User Group meeting in 2017. User presentations and discussions are also a critical part of the meeting and provide attendees the opportunity to influence the future direction of the software. All levels of RBI users are welcome to attend.

#### ABOUT E<sup>2</sup>G

E<sup>2</sup>G | The Equity Engineering Group, Inc. is a United States-based technology-driven company that provides products and services globally for the evaluation and management of aging industrial infrastructure across industries.
